EDUCATION

York University – Lassonde School of Engineering **Toronto, ON**
Honors Bachelor of Science (BSc), Major in Computer Science *Class of 2027*
Awards: ICE Award, IGCSE Cambridge UK, Highest Grades in Physics, Mathematics and Chemistry in A Levels, Lassonde Entrance Scholar

PROFESSIONAL EXPERIENCE

MyRide901 **Toronto, ON**
Mobile App Developer / Market Insights Co-op (Current) *Jan 2026 – April 2026*

- Architected a Python-driven ETL pipeline that syncs production MySQL data to Notion via GitHub Actions, automating weekly feature usage reporting for 100% data consistency.
- Developed REST APIs tracking user location, session duration, and core engagement metrics across a 40,000+ user base, feeding a centralized dashboard now used daily by the marketing and leadership teams for data-driven decisions.
- Engineered a cross-platform O2O (Offline-to-Online) attribution system to track app downloads across multiple retail locations, utilizing GA4 and Mobile Measurement Partners (MMPs) to achieve 100% data visibility.
- Successfully managed the submission and approval process for a major version update, coordinating technical documentation and metadata to meet App Store and Play Store compliance standards

Raasta AI **Toronto, ON**
Software Development Intern *May 2023 – May 2024*

- Built and optimized an AI-powered travel planner offering personalized itineraries and live translation for 5,000+ users.
- Designed and implemented algorithms for real-time safety alerts, itinerary personalization, and local experience sharing, increasing user retention by 30%.
- Secured seed funding from 1517 Fund, The Hub (UofT), DMZ, and NEXT36 through product pitching and technical demonstrations.
- Conducted market research on emerging travel technology trends, informing the team's 6-month product roadmap and strategic feature prioritization.

Research Paper | "Efficiency of Naive Bayes Algorithm for Spam Filtering" **Mumbai, India**
Lead Researcher & Author *May 2021 – February 2023*

- Conducted a large-scale study analyzing 6,000+ emails to evaluate Naive Bayes algorithm performance, achieving a 91% spam detection accuracy rate.
- Developed and deployed a Chrome web extension, **FilterMail**, leveraging the Naive Bayes algorithm to enhance email security for 500+ users.

PROJECTS

Motion-Controlled Visualization System **Toronto, ON**
Unity, C#, JavaScript, Android, WebSocket

- Engineered a cross-platform 3D visualization tool streaming **real-time motion data (60 Hz)** from smartphones to PCs, achieving **95% tracking accuracy**.
- Developed a modular system enabling **wireless control of 3D environments**, reducing latency by **30%** through optimized data transmission.

Formula 1 Performance Analytics Dashboard **Toronto, ON**
React.js, Recharts, JavaScript

- Built an interactive telemetry dashboard processing **1000+ data points per lap**, visualizing throttle, brake, RPM, and gear in real time.
- Simulated race conditions with **sector timing and pit-stop analytics**, improving performance insight generation speed by **40%**.

Spotify Analytics & Playback Interface **Toronto, ON**
React.js, Spotify Web API, OAuth

- Built a personalized music analytics dashboard to analyse user listening behaviour and engagement patterns.
- Visualized **top tracks, genres, and listening trends** across **50K+ data entries**, enhancing user engagement insights and playback control efficiency by **25%**.

VOLUNTEERING / NON-PROFESSIONAL EXPERIENCE

Speak To Lead **Mumbai, India**
Director of Digital Strategy *May 2018 – Present*

- Directed digital strategy for a non-profit empowering 300+ underprivileged students in India with English and public speaking skills.
- Increased digital engagement by 200% and tripled online learning participation through targeted campaigns and social media initiatives.
- Forged partnerships with 5+ institutions to expand learning resources and mentorship opportunities.
- Led a 20-member volunteer team to develop and deliver virtual workshops, improving program accessibility and retention rates.

SKILLS & INTERESTS SUMMARY

Technical Skills: Python, Java, JavaScript, SQL, Power BI, Looker Studio, Excel, React.js, Android Studio, Microsoft Azure, Git/GitHub, Looker Studio, Google Sheets, Oracle DB

Languages: English(Fluent), and German(Intermediate)
